BREACH SCENARIO

R1

The Silent Tenant

Your cloud team discovers a rogue Azure AD tenant that's been active for **6 months**. It has read access to your production data lake. No alerts were triggered.

What's your first move? →

BREACH SCENARIO

"This just happened. What do you do?"

The Deck of Hard Truths

BREACH SCENARIO

R2

3 AM Knock

German police are at your admin's door at 3 AM. **CVSS 10.0, no patch available**, your systems are exposed. You have 4 hours before expected exploitation begins.

BREACH SCENARIO

"This just happened. What do you do?"

The Deck of Hard Truths

BREACH SCENARIO

R3

The Trusted Insider

Your SIEM vendor's update mechanism was compromised. The malicious update has been running in your environment for **2 weeks**. Your security tool is now the threat.

What do you contain first? →

BREACH SCENARIO

"This just happened. What do you do?"

The Deck of Hard Truths

BREACH SCENARIO

R4

Supply Chain Monday

It's Monday morning. A critical npm package used across your CI/CD pipeline was **backdoored over the weekend**. Your devs ran npm install on Friday.

How many systems are compromised? →

illumio

BREACH SCENARIO

"This just happened. What do you do?"

The Deck of Hard Truths

BREACH SCENARIO

R5

The Ransomware Fork

Ransomware hits at 14:00 Friday. Attackers: **pay 2M EUR by midnight** or customer data goes public. Backups are 72h old. Legal says don't pay. PR says contain the story.

What's your call? →

illumio

BREACH SCENARIO

"This just happened. What do you do?"

The Deck of Hard Truths

BREACH SCENARIO

R6

The AI Assistant

An employee connected your internal knowledge base to an AI assistant "for productivity." The AI has been **summarizing confidential M&A documents** and caching them externally.

How do you even scope this? →

illumio

BREACH SCENARIO

"This just happened. What do you do?"

The Deck of Hard Truths

BREACH SCENARIO

R7

Lateral in 8 Minutes

EDR flags lateral movement. Attacker: compromised VPN endpoint to **domain controller in 8 minutes**. Your IR team's average mobilization time: 45 minutes.

What contained the blast radius? →
